PATENTS.

**AMERICAN AND FOREIGN OFFICE, AGENCY FOR BUSINESS WITH THE U. S. PATENT OFFICE.**
**WASHINGTON,**
NO. 76 STATE, OPPOSITE KILBY ST., BOSTON.

IMPORTANT INFORMATION TO INVENTORS. The Subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages, in applying for patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of *twenty*, as paid back by others,) will be remitted by him in case of failure to obtain a patent; and the withdrawal through him within thirty days after the rejection. Caveats, Specifications, Assignments, and all necessary papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions, and infringements of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, (generally about 30 per cent. less than those of others in the profession) but avail themselves of the experience of 20 years practice, his visits to the Patent Office, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides be ing saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar. Assignments recorded at Washington. Patents in Great Britain, France, and other foreign countries, secured through agents of the highest respectability.

R. H. EDDY,
*Solicitor of Patents.*

During the time I occupied the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston did business at the Patent Office, as Solicitor of procuring Patents. There were few, if any, persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity and success. I regard Mr. Eddy as one of the best informed and most skillful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office. EDMUND BURKE,
Late Commissioner of Patents."

*From the present Commissioner.*

"AUGUST 17th, 1855.—During the time I have held the office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, has been extensively engaged in the transaction of business with the office, as a solicitor. He is thoroughly acquainted with the law, and the rules of practice of the Office. I regard him as one of the most capable and successful practitioners with whom I have had official intercourse. CHAS. MASON,
Sept 12 1855. Commissioners of Patents.

NEWPORT,

BY CRANSTON & NORMAN

144 Thames Street.

TUESDAY MORNING, DEC. 4, 1855.

☞ We would earnestly advise our friends to join the class on History and the improvement of memory, which is to be taught by Mr. Armes, this Evening, at the vestry of Unitarian Church. Mr. Armes has the highest names of Church and State in warm commendation of his system, and his exhibition on Saturday evening satisfied us that his secret is invaluable. We hope his class will be at least one hundred as he proposes. Among the expressions from all parts of the country as to the utility of this science, Rev. Mr. Brooks, of this city says:—"Having become initiated into the principles of Mr. Arme's famous science, I am prepared to commend it to all as being of great partial benefit; it is efficient, simple, philosophical, and beautiful.

The class will commence at 7 o'clock this evening. See Advertisement.

---

☞ The singing school conducted by Mr. Tinkham, will be held this evening instead of to-morrow, as was intended.

---

—The following is the note Mr. Buchanan sent to the London Times, and which that journal refused to publish :—

"The American minister presents his compliments to the editors of Times, and assures them that they have been misinformed with respect to expression and conduct attributed to him in their leading article of this morning. Always mindful for the neutrality of his government, which he fully approves, it was with deep regret he learned, as he first did, from Washington, that attempts were made in the United States to recruit soldiers for the British army because he felt confident that these attempts would tend to weaken the friendly relations between the two countries, which it has been his ardent desire since his arrival in England to cherish and promote.—The American minister can, of course, enter into no discussion in the public journals of questions between the two governments, or state what it is, or what is not, contained in any correspondence which may have arisen out of these questions ; but he has felt it due, both to the Times and himself, to make this prompt correction."

The New York Bible Society held its 32d anniversary on Tuesday evening. Several addresses were delivered and the annual reports read, showing that total issues of Bibles for the past year amount to 57,604. Mr. Watson, one of the Society's Agents, has distributed among the destitute popula- Bible. Of the persons who he has visited one out of every seven were found without any Bible. The work among emigrants forms another interesting part of the Society. A large number of Bibles have been distributed in this quarter. More than five thousand Bibles and Testaments have distributed among the industrial schools of that city.—Phil. Sun.

Butter and Cheese in California.—A San Francisco paper chronicles the sale of 2000 pounds of diary cheese from the vicinity of Petaluma, to the market dealers, at 25 cents a pound ! The Petaluma Journal says that during June, July and August, one firm in that town bought and shipped to San Francisco over 22,000 pounds of butter, which averaged *fifty-eight* cents a pound ! In San Francisco, table butter has been selling during the summer at from 75 to 85 cents a pound ; and, at the sailing of the steamer, it had run up to $1 to $1 12, wholesale, and $1 15 retail !

---

Mo'lle Rachel.—Her attendant physician says that she has a pulmonary disease which in a milder climate or more general season, would have proved of but slight cosequence, but in a frame as delicate as Rachel's, and in view of the approach of our inclement winter, it was deemed the safest policy to hurry her departure to a tropical climate. Should she recover her health, she will probably return about next April.

Jane Stuart.—We had the pleasure this morning of seeing at the studio of this gifted artist, a masterly picture of Rachel in the character of "Phedre," painted from memory by Miss Stuart, and whilst the likeness is most striking and life-like, the picture altogether is characterized by a boldness of conception, as well as by a subtlety and spirit in execution, that we have seldom if ever seen equalled by the pencil of any living artist.

The picture by chance met the eye of Mr. Edwin Forest, who was so struck with its great character and force that he at once became the purchaser ; but has given his consent to have it on exhibition for a few days in this city. Mr. Forrest has also given Miss Stuart an order for a copy of her father's great picture of Washington—Boston Times.

Dangerous Counterfeit.—The Philadelphia Ledger says that five dollar bills on the Philadelphia Bank, altered to twenties are in circulation, and the alteration is so skillfully done that persones unacquainted with the notes of the bank would be likely to be deceived.

Lamentations for a Pet Dog.—It was estimated once, b. a Greek philosopher, that the affections bestowed by ladies on their pet dogs were sufficient to sooth the miseries of the bachelors of the universe. This is a pretty sweeping calculation ; but it may be true. There have been instances of attachment for dogs stronger than that of consanguinity. Byron confessed that the only friend he ever knew was of the canine species, and he is eulogized by the poet as "in life the firmest friend, the first to welcome and foremost to defend" his master. Jenny Lind carried her "Prince Charles" through the streets in her arms, and fondled him in such manner at her concert rehearsals as almost to make men envious. We heard of a case of domestic affliction in this city, the other day,—touching, heartfelt woe, real solemn grief with an attendant tear,—which was occasioned by the death of a pet dog : "Trip," of the blood royal, a creature of much dignity and many virtues ; who had watched his mistress an angel in her cradle, and who had often responded to her childish prattle with a gambol meant to be amusing. It is not very strange, perhaps, that the death of such an associate should be signalized by more than common attentions, that his lifeless body should be washed and decorated and laid in state by fair hands, that the ordinary pleasure of the household should be suspended for a time in honor of so old and confidential a companion, and that a black sexton should be summoned to commit, with decency, his remains to the earth.—There are some who will think that this is running grief into the ground ; but they jest at dog-sorrow who never had a pet.—Boston Courier.

Death of Dudley Selden.—The death of this distinguished lawyer and gentleman at Paris, announced in a letter from that city dated Nov. 8th, will be learned with deep regret in this city and throughout the country. He had a stroke of apoplexy about four years ago in Paris, and has been an invalid since that time. Dudley Selden was formerly a prominent member of the bar of this city, and was a well known politician. Originally a Democrat, he was elected to Congress in 1833 by the Democracy of this city. He opposed the U. S Bank policy of Andrew Jackson, and resigned his seat before the expiration of his term. He then joined the Henry Clay force, and remained a whig up to the period of his death. By the death of his father in law, Mr. Packard, a Cuban planter of immense wealth, Mr. Selden came into the possession of a large estate, which has engrossed all the time which he had occasion or inclination to devote to business of any kind since that time. Almost immediately after the death of Mr. Packard, resided until his death.—N.Y. Mirror.

Naval.—The flag-ship Jamestown was at St Vincent, (Porto Grande,) October 26th, and sailed 30th for Porto Praya and the Coast of Africa southward. Would be down the coast five to six months.

The Dale was at St. Vincent (Porto Grande,) and sailed Oct. 31 to join the Commodore at Porto Praya, and thence to the United States. All well in both ships

The master and crew or the late brig or bark Kalafat, of Bath, were on board the Dale, for passage to the United States, the Kalafat having been sunk in the English channel by collision—said to have been from Cardiff for Pensacola. The master and crew of the Kalafat all saved and well.

Sorry to Hear It.—We find the following paragraph in the Boston Evening Journal of Friday :

Retrenchment. — The semi-weekly Woonsocket Patriot is discontinued on account of a want of patronage. The weekly will be continued as before. Mr. Foss made an excellent paper of his semi-weekly, and it deserves a better fate.

Sad Fate of a Spiritualist. We learn from a correspondent that last week a woman named Elizabeth Jewett, who formerally resided at South Boston, but has been stopping in Gardiner, Me., became interested in the spiritual developements of the present day, and finally her feelings were wrought up to such a degree, that reasons was dethroned. Acting as she alleged under direction of the spirits, she wrote a note informing her friends that she might be found in a certain creek, running into the Kennebec river near Gardiner, and leaving it in her chamber, disappeared.—The body was soon found at the place she designated floating in the water, but confined by a rope tied around her waist and attached to a tree.—Boston Traveller.

---

The Size of Man.—A ridiculous statement has run through the papers of Adam's having been 123 feet high, Eve 113 Noah 103, &c.—The Egyptian mummies, if they are good for nothing else, prove the interesting fact that for three or four thousand years past, man has not changed in statute. If, therefore, no diminution of it has taken place in the course of all that time, but the average size of the race is the same now as then, is there a reasonable probability that it was materially different in two thousand years preceding,—The argument is strong that it was not.

## A MOTHER.

When other friends have left thee,
When other smiles have flown ;
When nought in other bosoms throb,
In union with thine own.
When miseries oppress thee,
And tears thine eyelids fill;
A *Mother* then, will bless thee,
And love thee fondly still.

Her smiles will ne'er forsake thee,
And ne'er her frowns reprove ;
Then will thou learn how dear it is,
To gain a mother's love.
Her hand will press thy brow,
And cool thy fevered brain ;
Bring back to thee the jewel lost,
Thy happiness, again.

Her soothing words will comfort,
With sympathy's warm beam,
And drive away those bitter thoughts,
As shadow o'er a stream.
Then all ye shallow prodigals,
Oh ! never with *Mother* part ;
For she, and only she can bring,
The sunshine to thy heart.

The Grape Crop of California.—From information derived from Dr. Trask who recently has returned from a tour of observation through the southern country, we learn that the grape crop of the present year is likely to prove much more abundant than has been the case in former seasons, while a corresponding increase of the trade in fruit between Los Angeles and this port may be confidently counted upon.—During the continuance of the season last year, an amount, of at most not over five hundred tons, formed the aggregate of shipments to San Francisco. During the present year, it is stated that the quantity already received and to be received here will not fall short of fifteen hundred tons, showing a two-thirds increase over the product of last year in the quantity exported alone. Independently of this, arrangements have been in progress for the more extensive manufacture of the juice of the grape, and we learn that at least 200,000 gallons of Los Angeles wine will be brought into market this winter as a moderate sample of what we will be enabled to do in this line henceforth.

---

Yankee Big Guns.—Every day for some time past, the firing of great guns on the environs of Richmond has been kept up. The Tredegar Company had a contract for casting the guns for the new steam frigates and they have thus far proved a match for Uncle Sam's powder and ball—not one having bursted in the test to which they have been submitted. They are now trying two formidable guns, made for the government, upon an entirely new plan. Each gun is to be fired one thousand times in succession with the ordinary charge, and if they stand that test, then the charge is to be increased, and the guns fired until they burst. The object is to ascertain at what part of the gun the [illegible] the thickness of the metal in these places having been graduated upon a plan different from that hitherto in vogue.—Petersburg (Va.) Express.

A contract has been entered into between the pasha of Egypt and an English engineer, for the establishment of an electric telegraph from Cairo to Suez, to be completed within eight months, and the iron beacons which are to mark the dangerous shoals and rocks at the entrance of the port of Alexandria, will, it is expected, be erected by the end of the year.

---

In Meade county, Ky., Martha Chapple has recovered $1000 damages from Gen. Tickell, for breach of promise of marriage. The damage was laid at $10,000 ; the lawyers always draw their writs with a wide margin. The general is probably tickled to escape from the Chapel with a loss of $1000 only.

---

Laugh on, and never mind the censure of cynics. Joy is one of the greatest panaceas of life. It graces the nerves, makes the heart dance to pleasant music and the very soul ring again with harmonious sounds. It is the delight of the good, makes sunshine where there would be all shadow and gloom, promotes domestic happiness, drives away sorrow, and prepares the mind for the exigencies of the future ; so laugh on—but laugh discreetly, and in due season.

---

A new kind of Ape.—Professor Owen, the celebrated naturalist, describes a species of ape recently discovered on the western coast of africa, named the Gorrilla species, the adults of which attain the height of five feet five inches, and are three feet broad across the chest. His head is double the size of a man's, and its extremities are enormously developed. They exist in some numbers in the interminable forests of Gambia river. The negroes of the country, in their excursions into the forest in search of ivory, exhibited little fear of the lion, as it slunk away from man ; but they dreaded the gorrilla, for when he saw a man advancing he came down out of the trees to the attack, and could strangle a man with the greatest ease. The strength of this man ape is enormous ; his jaw is as powerful as that of a lion, and his canine teeth equally formidable.

The rush of emigrants to the "Far West" continues. There is not a day passes but scores of people reach our city, *en route* for Illinois, Missouri, and other points west of us.—Nashville (Tenn.) Union.

"A thing of beauty
Is a joy forever,"

So sang the gifted poet Keats. What can be more beautiful than a fine head of hair, that noblest of nature's adornments. Who, that is young, but values the luxuriant locks of youth, and would preserve them ; and who that is old but would commend Lyon's Kathairon, universally acknowledged to be the most valuable and the most delightfully perfumed toilet article ever prepared. MARVELLOUS REMEDY!

FOR A MARVELLOUS AGE !!

HOLLOWAY'S OINTMENT.

THE GRAND EXTERNAL REMEDY,

By the aid of a microscope, we see millions of little openings on the surface of our bodies. Through these this Ointment, when rubbed on the skin, is carried to any organ or inward part. Diseases of the Kidneys, disorders of the Liver, affections of the heart, Inflamation of the Lungs, Asthmas, Coughs and Colds, are by its means effectually cured. Every housewife knows that salt passes freely through bone or meat of any thickness. This healing Ointment far more readily penetrates through any bone or fleshy part of the living body, curing the most dangerous inward complaints, that cannot be reached by other means.

ERYSIPELAS, SALT RHEUM and SCORBUTIC HUMORS.

No remedy has ever done so much for the cure of diseases of the Skin, whatever form they may assume as this Ointment. No case of Salt Rheum, Scurvy, Sore Head, Scrofula, or Erysipelas, can long withstand its influence The inventor has traveled over many parts of the globe, visiting the principal hospitals dispensing this Ointment giving advice as to its application and has thus been the means of restoring countless numbers to health

SORE LEGS, SORE BREASTS, WOUNDS AND ULCERS.

Some of the most scientific surgeons now rely solely on the use of this wonderful Ointment when having to cope with the worst cases of sores, wounds, ulcers glandular swellings, and tumors. Professor Holloway has by command of the Allied Governments, dispatched to the hospitals of the East large shipments of this Ointment, to be used under the direction of the *Medical Staff*, in the worst cases of wounds. It will cure any ulcer, glandular swelling stiffness or contraction of the joints, even of 20 years, standing.

PILES AND FISTULAS.

These and other similar distressing complaints can be effectually cured if the Ointment be well rubbed in over the parts affected, and by otherwise follow ing the printed directions around each pot.

*Both the Ointment and Pills should be used in the following cases:*

PROFESSOR WOOD'S
HAIR RESTORATIVE

IS, no doubt, the most wonderful discovery of this age of progress. The following is from a distinguished member of the medical profession:

St. Paul, January 1, 1855.

Prof. O. J. Wood,—Dear Sir—Unsolicited, I send you this certificate. After being nearly bald for a long time, and having tried all the hair restoratives extant, and having no faith in any, I was induced on hearing of yours, to give it a trial. I placed myself in the hands of a barber, and had my head well rubbed with a good stiff brush, and the Restorative then applied and well rubbed in, till the scalp was all aglow. This I repeated every morning, and in three weeks the young hair appeared, and grew rapidly from August last up to the present time, and is now thick, black, and strong—soft and pleasant to the touch; whereas before it was harsh and wiry, what little there was of it and that little was disappearing rapidly. I still use your Restorative about twice a week, and shall soon have a good, and perfect crop of hair. Now I have read of these things—and who has not?—but have never seen hitherto, any case in which any person's hair was really benefitted by any of the hair tonics, &c., of the day; and it really gives me pleasure to record the result of my experience, I have recommended your preparation to others, and it already has a large and general sale throughout the Territory. The people here saw its effects, and have confidence in it. All who have used it here, will coincide with me in what I have written. The supply you sent us as the wholesale agents for the Territory, is already exhausted, and daily inquiries are made for it. You deserve credit for your discovery. I for one return you thanks for the benefit it has done me, for I certainly had despaired long ago of ever effecting such result. I congratulate you that your fortune (and a large one) is already made.

Yours, hastily,
J. W. BOND,
Firm of Bond & Kellog, Druggists, St. Paul, [M. T.]

Brookfield, Mass., Jan'y 12th, 1855.

Prof. Wood,—Dear Sir,—Having made a trial of your Hair Restorative, it gives me pleasure to say, that its effect has been excellent in removing inflammation, dandruff, and a constant itching with which I have been troubled from childhood, and has also restored hair which was becoming gray, to its original color. I have used no other article, with anything like the pleasure and profit.

Yours truly,
J. K. BRAGG,
Pastor of the Orthodox Church, Brookfield,

Also for sale, WOOD'S Oriental Lenative Liniment and Vegetable Magic Life Pills. Warranted to give satisfaction, or the money refunded. See Circulars. Address

CORRECT TIME.

A GREAT diversity of opinion existing in regard to what is correct time, and many being misled by the false representations of the new clock recently erected at the expense of the State, in the State House in this city, have induced the undersigned for the purpose of furnishing correct standard Time, to use extra exertions to secure that object. He has placed in his Fancy Goods and Jewelry establishment, a Regulator of exquisite workmanship and unvarying in performance, which will, at all times, show the accurate standard mean time, as promulgated by daily observations at Brown University and the Observatory at Cambridge, Mass. The mails close, and the Steamboats and Railroads throughout New England are governed by this time.

THE Burglar's Alarm and Physician's Night Bell and Lamp!—This instrument, patented August 21, 1853, is simple and certain in its operation, and gives security against the depredations of burglars. An attempt to open any door or window connected with this apparatus, will cause an alarm loud and long, to be rung, and a common hand lamp to be lighted at the same instant. The burglar, frightened at the alarm he has raised, will hastily abscond, even before an actual entrance is made.

Physicians and Apothecaries will also find the article of great utility. For such purposes, it is operated by a bell-pull at the street door, and will save the expense and convenience of a constantly burning light.

When compared with other instruments invented for the same purpose, this alarm is admitted to be vastly superior, both as to the efficiency of the alarm, and the certainty of ignition. For sale at TISDALE'S, 116 Thames st.

THE GREATEST WONDER OF THE AGE.

A REMEDY Which CURES IN FIVE MINUTES.—M. LEROUX'S French Cholera Cognac Bitters.—This truly wonderful scientific compound is recommended by the most eminent and learned physicians of all Europe and America; and enjoys the best reputation of anything similar ever offered. It is without doubt the best, most efficient and generally acknowledged remedy against cholera, dysentery, diarrhoea, and complaints of the stomach in general. The numerous patients who have tried it according to directions have invariably found relief in a very short time, and the best proof of it is, that since this standard remedy was introduced in the armies of the Allies in the Crimea, the mortality of the soldiers from cholera and similar diseases was diminished by over 75 per cent.; in consideration of which, the inventor was presented by the French and English governments with a gold medal, bearing the inscription, "Hail! M. Leroux, the great chemist and inventor, by whose knowledge our armies are preserved from cholera."

This invaluable preparation is also a remedy for biliousness, indigestion, weakness, and general derangement of the stomach. Upon being taken, it creates appetite, and prevents the heaviness attendant upon eating by persons who are dyspeptic.

In this city, also this remedy has been tried with the most undoubted success, and the undersigned can produce the best testimonials of our most celebrated physicians, as to its immediate and complete success, which he will be happy at any time to show to any, that may wish to see them. S. STEINFELD.
Sole Agents for the United States, 70 Nassau street, corner of John, N. Y.

## SOAP! SOAP!!

THE subscriber is now prepared to furnish the highly celebrated American Cream, American Laundry, American Manufacturers' Soap, and Cream Soap preparation. These soaps are presented to the public with the fullest confidence in their superiority and utility. A fair trial according to the directions given below, cannot fail to be entirely satisfactory; and an argument more conclusive than pages of certificates and recommendations. A fair trial is all I ask. These soaps do the work of the Laundry in the best manner in cold water, either hard or soft, or salt, dispensing entirely with boiling, pounding, washing machines, &c., without injury to the most delicate fabric. In cold weather, health may render it advisable to take the chill off the water.

The tendency of these soaps is to soften the clothes and loosen the hold of the dirt, without injury.

DIRECTIONS FOR USE.—White Clothes—Rub the soap freely on all soiled spots, make a strong suds in water, sufficient to cover, soak a few hours, or all night if convenient, when with a common hand rubbing and thorough rinsing, they will be perfectly clean and beautifully bleached.

Calicoes and other colored articles, wash without soaking and rinse.

Woolens—Wash in warm suds (to prevent shrinking) and rinse.

Merinoes, Silk Velvets, Silks, Ribbons, &c. Wash in strong suds and rinse.

To take Lamp Oil, Wheel Grease, Grease Spots, &c. out of Carpets, Table Covers, and Clothing, rub the soap on freely, soak some time in strong suds, rub out and rinse. Ink spots and stains, use full strength, soak, and wash in hot water.

Gilding and Mahogany.—Wash in weak suds, rub with silk cloth and rinse. Paint, wash in strong suds.

For all other purposes, use as you do the common bar soap, and you will be compelled to admit that it surpasses all other soaps. Manufactured and for sale wholesale and retail, by
C. G. HANDY,
Depot 220 Thames-st.

## SPRATT'S LIGHTNING RODS!

WITH branched and other points made of pure copper and gilded with fine gold; all of which are warranted to preserve the extremity sharp and bright. Eight times as good a conductor as a spurious imitation made of Cast Iron, and sold last year by some dealers in Lightning Rods.

Also, Fixtures for a new and valuable improvement in applying Insulators by which the glass is kept dry, causing no leaks in roofs of buildings, and effectually preventing the Electrical Fluid from being conducted by iron screws and drives into the seen.

The following recommendations have been furnished gratuitously—
Louisville, Jan. 27, 1851.

The Lightning Conductors on the plan of J. Spratt, of Cincinnati, appear to be very well devised, and in point of mechanical construction, are the best I have ever seene.

It is to be hoped that the use of these rods may become general as an important auxiliary defence against a danger which must be regarded as of no ordinary magnitude, to which all buildings are liable.
B. SILLIMAN, Jr.
Prof. of Chem. in the Univ. of Louisville.

This will certify that I have examined the Lightning Rods, Metallic Points, and Insulating Attachments, manufactured by Mr. Spratt, of Cincinnati, Ohio, and regard them as constructed in conformity to the general laws of the electric fluid; and the Gilded Copper Branched Points, as promising, from the results of several tests to which they were submitted, to resist for years the action of those atmospheric causes most likely to corrode them.
